SKILLS

Programming Languages: HTML, CSS, JavaScript, Java, PHP
Frameworks: React.js, Next.js, Node.js, Express
Databases: MongoDB, SQL
Tools: GitHub, Firebase, Render, NPM, Vercel, DataDog, Slack, Jira, i18nexus

EXPERIENCE

Junior Full Stack Developer Intern

Transfi FinTech

June 2024 - Present, Remote

- Contributed to both the frontend (Transfi-Elsa) and backend, leveraging microservices architecture through a gateway to build scalable payment solutions. Developed a script to detect inactive payment methods by currency, improving the accuracy of international transactions.
- Worked within the Ramp Tech team, fixing bugs and collaborating on multiple projects. Gained experience with Datadog, StatesCounter, i18next, and Jira, integrating APIs for seamless product functionality.

Frontend Developer Intern

Delbo Digital Pvt Ltd |

April 2023 - January 2024, Bangalore, India

- Contributed to the early stages of building the QuickCommerce platform as a frontend developer, working closely with backend teams and designers to implement features and refine the user interface.
- Implemented location-based functionality to fetch users' latitude and longitude, suggesting their address during checkout to reduce manual input. Utilized React's Context API and integrated APIs for real-time data fetching, ensuring responsive, seamless location-based features.

PROJECTS

Online Doctor Appointment (Skylabs)

College Project HTML, CSS, JavaScript, PHP

- Developed a web application for booking doctor appointments and purchasing medicines online.
- Integrated payment gateways for secure online transactions.
- Built as a college project to streamline the appointment booking process for users.

Weather App & URL Shortener

(React, OpenWeather API, Node.js, Express, MongoDB, Pug.js)

- Developed a Weather App that fetches and displays real-time weather data using the OpenWeather API
- Built a URL Shortener with custom URL aliasing and analytics tracking.

Chrome Extensions & Useful npm Packages

(JavaScript, APIs, npm Packages)

- Developed Chrome extensions for generating random addresses based on IP for testing payment methods in different regions.
- Built a random wallet generator for cryptocurrencies.
- Created multiple npm packages that improve functionality and streamline development workflows.

Other Projects And Project Urls

MERN Stack

- Car Dealer Website: Developed a responsive car dealer website with a full inventory system and contact forms.
- Screen Recorder: Created a web-based screen recording tool to capture and save user activity in real time.
- Portfolio Website: Developed a personal portfolio showcasing projects and links to GitHub, LinkedIn, and other profiles.
